'NEXTGEN' TRAILER KITS

AIR BRAKE CORPORATION is the leading supplier of ADR38 approved trailer air brake kits in Australia, and our popular 'ABK38...' series has become the industry standard for quality, reliability, and ease of installation.

In our quest for continuous product improvement, we have added to these widely used kits a new range of kits designed to provide an even more economical and flexible alternative, with your choice of PACIFIC, SEALCO, or WABCO service relay valves, or the option of the latest WABCO 'VCS2' ABS, all under the same ADR38/02 approval number.

This new 'ABC' series retains many the popular features pioneered by AIR BRAKE CORPORATION, like exclusive TSE springbrakes, pre-installed fittings for rapid installation, and SEALCO ADR38/02 compliant service system priority springbrake valve. In addition, revised valving and piping configurations have improved axle to axle pressure balance and roadtrain release times, and the dog trailer kits now accommodate an optional pressure controlled 'blocking' valve that reduces front axle brake wear without affecting ADR38 performance at higher pressures (a feature particularly important in preventing disc brake damage).

- ✓ Your choice of renowned PACIFIC, SEALCO or WABCO service relay valve/s.
- ✓ Option of latest compact, highly integrated, self-configuring WABCO 'VCS2' ABS.
- ✓ Fast release and optimum balance at critical pressures on multiple trailer combinations.
- ✓ Reduced front axle brake wear on dog trailers with optional 'blocking' valve.
- ✓ Kit 'streamlining' with all fittings pre-installed in valves for rapid installation.
- ✓ Exclusive TSE springbrakes, including new 'HOT' model for disc brake apps.
